

MANSI PATEL

 mansip140904@gmail.com  (306) 351-3048  Regina, SK  [LinkedIn](#)

PROFESSIONAL SUMMARY

Full Stack Cloud Engineer with expertise in architecting scalable, cloud-native microservices and implementing secure CI/CD pipelines. Proven track record in building production-grade applications using MERN and Spring Boot, leveraging Infrastructure as Code (IaC) tools like Terraform. Skilled in RESTful APIs, containerization with Docker and Kubernetes, and agile methodologies including Scrum. Adept at performance optimization, security best practices (OWASP), and cross-functional collaboration to deliver high-quality, maintainable software solutions.

PROFESSIONAL EXPERIENCE

- Full Stack Engineer** – Pqxel Inc. May 2025 - June 2026 | Regina, SK
- Engineers end-to-end development of web-based platforms using React, Node.js, Express, and MongoDB.
 - Architects reusable front-end components, responsive UI, and API-driven features aligned with enterprise product requirements.
 - Spearheads Agile workflows using Jira, performing code reviews, debugging, and version control best practices.
- Service Support Intern** – University of Regina May 2024 – Dec 2024 | Regina, SK
- Optimized mission-critical IT infrastructure for live events, resolving complex networking and hardware bottlenecks.
 - Modernized ticketing and networking systems (Wi-Fi/POS), ensuring seamless operational flow for university-scale events.

EDUCATION & CERTIFICATIONS

- University of Regina** Dec 2024
- Diploma in Computer Science

CERTIFICATIONS

- Technical Support Fundamentals** – Google
- Artificial Intelligence (AI)** – Programming Hub (Google)
- Introduction to HTML, CSS & JavaScript** – IBM
- Introduction to Cloud Computing** – IBM
- Getting Started with Git & GitHub** – IBM

CORE SKILLS

- Programming Languages:** JavaScript (ES6+), TypeScript, Java, Python (NumPy, Pandas, Matplotlib, PyTorch, TensorFlow), C/C++, C#, PHP
- Frontend Technologies:** React, Redux, HTML5, CSS3, EJS, jQuery, Framer
- Backend Technologies & Frameworks:** Node.js, Express, REST, RESTful APIs, Spring Boot, GraphQL, Microservices
- Databases:** MongoDB, MySQL
- DevOps & Cloud:** AWS (EKS, ECR, EC2, IAM, CloudWatch), GCP (App Engine, Cloud Build, Artifact Registry), Azure (basic), Terraform, Infrastructure as Code (IaC), Jenkins, GitHub Actions (basic), ArgoCD (GitOps), CI/CD, Continuous Integration, Continuous Deployment
- Containerization & Orchestration:** Docker, Containerization, Docker Compose, Kubernetes (kubect!, Dashboard), Helm
- Testing & Quality Assurance:** Unit Testing, Test Automation, SonarQube, Trivy
- Tools & Platforms:** Git/GitHub, Version Control, Postman, Prometheus, Grafana, CloudWatch, Jira, VS Code, Visual Studio, Figma, Canva, WordPress, Adobe Illustrator
- Methodologies & Practices:** Agile, Scrum, Performance Optimization, Security Best Practices, OWASP, Cross-functional Collaboration, Debugging and Troubleshooting

SIGNATURE PROJECTS

Production-Grade AWS DevOps Ecosystem

- Architected a fully automated GitOps pipeline using Terraform to provision VPCs, IAM roles, and EKS clusters.
- Implemented automated quality gates using SonarQube and Trivy, ensuring 100% of code commits meet security standards before ECR deployment.
- Enabled real-time observability via Prometheus and Grafana, providing enterprise-level dashboards for system health.

Enterprise SaaS Task Orchestrator

- Engineered a role-based task management engine utilizing JWT authentication and MERN stack, deployed with full CI/CD automation.
- Integrated advanced analytics via ExcelJS and Recharts, transforming raw data into actionable business intelligence.

Real-Time Chat App on Google Cloud — Full-Stack — 2025

- Group chat using Node.js, Express, Socket.IO.
- Deployed to GCP App Engine with IAM, Artifact Registry, and Cloud Build fixes.

Cloud Vendor Management API — Backend — 2025

- REST CRUD for vendor entities in Spring Boot; tested with Postman.
- Ran Agile sprints in Jira with Epics/Stories.
