PROFILE

Full Stack Cloud Engineer working at the intersection of solid infrastructure and considered design. I architect scalable, cloud-native systems and craft interfaces with a designer's eye — turning complex infrastructure into products that feel effortless.

EXPERIENCE

Full Stack Engineer

Pqxel Inc.

May 2025 — Jun 2026

Regina, SK · Remote

- Engineered end-to-end web platforms using React, Node.js, Express and MongoDB.
- Architected reusable front-end components, responsive UI and API-driven features for enterprise products.
- Spearheaded Agile workflows in Jira, performing code reviews, debugging and version-control best practices.

Service Support Intern

University of Regina

May 2024 — Dec 2024

Regina, SK · On-site

- Optimized mission-critical IT infrastructure for live events, resolving complex networking and hardware bottlenecks.
- Modernized ticketing and networking systems (Wi-Fi / POS) for seamless university-scale event operations.

SKILLS

Cloud & DevOps: AWS (EKS, ECR, EC2, IAM), Terraform, Docker, Kubernetes, Helm, ArgoCD, Jenkins, Prometheus, Grafana
